[04:14:15] i guess the main thing is if they do it properly [04:14:17] we can usually compress them [04:14:18] maybe bring them to around 300mb or so [04:14:30] get them in that the community likes [04:14:33] then we can work out a way to make a new release [04:14:38] i agree though that we should probably work on getting them up to 15mb or so [04:15:20] Any of you guys know anything about making xbmc? [04:15:24] I was thinking of making a xbmc-quicklauncher [04:15:33] what you mean by that? [04:15:39] I basically just want to put all my xbmc shortcuts and configs into a little app instead of on my desktop. [04:15:48] Well, if anyone knows, it would be useful for me to know. [04:16:01] I'm pretty much working it now. [04:16:08] Like I said before, I want to make an xbmc-quicklauncher. [04:16:20] maybe we could make a big circle of we don't do things [04:16:26] and we can implement new ideas in there [04:16:34] A circle? [04:16:40] yeah [04:16:42] I don't know how things would be organized in a circle [04:16:49] And I'm not sure how to add an idea to that circle [04:16:51] 82157476af
